

BRB 6373

INCI NAME: Cyclopentasiloxane and PEG/PPG-18/18
Dimethicone

Issue date: Nov, 2015

Description

BRB 6373 is a 10% dispersion of a high molecular weight silicone copolymer into cyclopentasiloxane.

Application

BRB 6373 creates flawless emulsions designed for every segment: Skin care products (lotions, clear gels, creams, water bead creams), Sun care products, Color cosmetics, Hair styling and treatments and Antiperspirants and deodorants.

Features and Benefits

- Creates elegant silky emulsions
- Provides non-comedogenic and skin breathable systems
- Small particle size for long term stability
- Versatility of textures and sensory profiles
- Room temperature process (if solid free)

Typical Data

Parameter	Unit	Value
Appearance		Translucent to white liquid
Non Volatile content	%	10
Specific Gravity		0.956
Viscosity	cSt	30
HLB		2

How to Use

Combine **BRB 6373** with the rest of the silicone phase. Addition of 1-2% of electrolyte (preferably NaCl) in the water phase is very important to ensure stability. Slowly incorporate water phase into silicone phase. Once emulsion is created, proceed to stir intensively.

Increasing the water content will boost final viscosity.

BRB 6373 is not water soluble. **BRB 6373** is soluble with isododecane, ethanol, some vegetable oils and esters and silicones.

A Product Safety Data Sheet should be obtained from your BRB office prior to use.

ATTENTION: Before handling, read product information, Product Safety Data Sheets and container labels for safe use, and any physical and/or health hazard information.
