

BRB PMS-2

INCI NAME: Polymethylsilsesquioxane

Issue date: May, 2015

Description

BRB PMS-2 is a spherical silicon resin with an average particle size of 2 μm providing an exceptional feel to the skin when incorporated into cosmetic formulations.

Application

- Skin care products: facial creams and lotions, serums, anti-aging products.
- Color cosmetics: foundations, pressed & loose powders, lipsticks, mascaras, eye shadows or concealers.

Features

The excellent lubricity and soft silky feel of BRB PMS-2 helps formulators to improve the sensory profile of any skin care or color cosmetic formula.

Benefits

- Soft focus effect, reduction of fine lines and wrinkles
- Luxurious smooth dry feel
- Exceptional lubricity, due to ball bearing effect
- Prevention of pigment and powder agglomeration
- Sebum Absorption
- Water repellence improvement

Typical Data

Parameter	Unit	Value
Appearance		White Fine Powder
Average Particle size	μm	2
Specific Gravity @ 25°C		1.32
Refractive Index		1.42
pH		7
Water content	%	< 1

How to Use

BRB PMS-2 can be easily incorporated into a cosmetic formulation at room temperature. It is effective even at low addition level from 0,2 % up to 10 % based on the formulation type.

A Product Safety Data Sheet should be obtained from your BRB office prior to use.

ATTENTION: Before handling, read product information, Product Safety Data Sheets and container labels for safe use, and any physical and/or health hazard information.
